## **DETAILED ACTION**

In response to Amendment filed February 25, 2005

### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:
  - a. Claims 1 - 21 are allowable over the Prior Art of Record because it fails to teach or suggest a method of making a shoe correction for the alignment of a person's foot comprising the step of maintaining the person's lower leg in the forward inclined position at the pre-selected angle, measuring the lateral angular alignment of the foot in combination with the remaining limitations of the claims.
  - b. Claims 22- 32 are allowable over the Prior Art of Record because it fails to teach or suggest a method of making a shoe correction for the alignment of a person's foot comprising the step of selecting from a database appropriate corrective components for incorporation into a shoe to correct the alignment of the person's foot in combination with the remaining limitations of the claims.

- c. Claims 33 - 36 are allowable over the Prior Art of Record because it fails to teach or suggest a kit for quantifying and making a shoe correction for a misalignment of a person's foot comprising (a) a dorsiflexion template adapted to position the person's lower leg and (b) a subtalar joint inclinometer to measure the lateral angular alignment of the person's foot when the person's lower leg is inclined at the preselected angle in combination with the remaining limitations of the claims.
- d. Claims 37- 56 are allowable over the Prior Art of Record because it fails to teach or suggest a corrective alignment insole assembly for making a shoe correction for the alignment of a person's foot comprising a base insole in combination with at least one of at least one supination control pad, at least one pronation control pad, or at least one arch control pad, wherein the at least one supination control pad, the at least one pronation control pad and the at least one arch control pad are selected based upon a lateral angular alignment measurement of the person's foot in combination with the remaining limitations of the claims.
- e. Claim 59 is allowable over the Prior Art of Record because it fails to teach or suggest a subtalar joint inclinometer for measuring the lateral angular alignment of a person's foot when the person is in a standing position, comprising a calcaneal bisection gauge for inscribing a reference line on the heel of the person aligned with the person's Achilles tendon when the person is standing in combination with the remaining limitations of the claims.

f. Claims 60 - 68 are allowable over the Prior Art of Record because it fails to teach or suggest a database for selecting at least one corrective alignment insole component for making a shoe correction for a misalignment of a person's foot based upon a measurement of a lateral angular alignment of a person's foot comprising a plurality of pre-selected lateral angular alignment values correlated to the at least one corrective alignment insole component so that the at least one corrective alignment insole component can be selected from the database based upon the lateral angular alignment measurement in combination with the remaining limitations of the claims.

g. Claims 69 – 72 are allowable over the Prior Art of Record because it fails to teach or suggest a subtalar joint inclinometer for measuring the lateral angular alignment of a person's foot when the person is in a standing position, comprising a protractor scale indicia on one of the base second portion and the heel alignment member and a reference line indicia on the other of the base second portion and the heel alignment member, wherein the reference line indicia is aligned with a zero position on the protractor scale indicia when the person's heel has a zero angular alignment and is adapted to indicate on the protractor scale indicia the degree of angular deviation of the person's foot from zero angular alignment in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
